Portfolio

- **Roomify** - project about management of reservation class rooms proposed to University of Turin Polytechnic in Tashkent. Personally did the backend (ASP.NET Core) side of this project.

- **Happy Birthday Polito** - There are empty monitors in the halls of the Polytechnic University of Turin. In order to make the most of them, it displays the students whose birthday is on the current day. I made it's backend (ASP.NET Core)

- **Tarvooz** - online marketplace specializing in providing information about sales statistics. Won 1-place in Sharpist battle. frontend (Angular) backend (ASP.NET Core)

- **PrayReminderBot** - A telegram bot that reminds you of 5 daily prayer times, including prayer times for 12 regions and the regions of Karakalpakstan. backend (ASP.NET Core)

- **Namoz Vaqtlari API** - Free API containing prayer times for 12 regions in Uzbekistan and Karakalpakstan. frontend (Angular) backend (ASP.NET Core)
